With Gozaisho Ropeway, having an overall length of 2,160m, you can enjoy the 12-minute walking in the sky up to the top of the Mount Gozaisho at the elevation of 1,212m. You can look out over the city of Nagoya, Ise Bay and Chubu International Airport from the car gondolas and the observation platform at the summit.

Gozaisho Ropeway is attractive also in winter.
How to enjoy it in winter

When the car gondola starts going up, the scenery starts changing gradually from the lower bound, and when you arrive at the top of the mountain, it is the very different world. The snowy landscape spreads in front of your eyes. When the weather conditions

are perfect, the frost is formed on the trees, and the beauty glowing in the sunlight and in the blue sky is exceptional. Mount Gozaisho is the snowiest area in Mie prefecture and there is the only ski slope in Mie pref. at the summit. You can also enjoy the winter sport such as skiing and sledding. The ski slope is compact, so it is crowded with skiing beginners and families with small children on holidays. Snow is not removed on a part of promenade intentionally, so you can also walk on the snowy path with snow shoes on.

*Skis, ski poles, boots, sleds, and snow shoes can be rented. There is no rental service for skiing wear and snow boots.

61M
The height of the steel tower as the ropeway is
"the highest in Japan".

I chose to stand near the top of Mt. Gozaisho. In January, the snow is deep and the sky is clear. It's a great place for beginners to play on the ski slope!
